

AUTOMATION POWER POINT™

Stagehand motion controllers and **Spikemark** software automate spectacular effects on hundreds of stages every night. Every deck winch, turntable, and stage lift needs electrical cables. Routing cords from each effect to power distro, emergency stop controllers, and network switches is inconvenient and makes a mess in the wings. Automation needs to be faster to load-in, run, and strike – with less cable clutter.

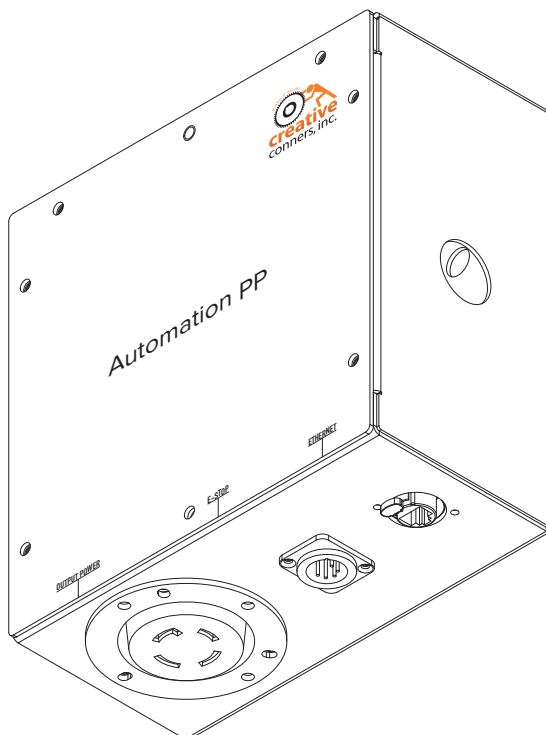

The **Automation Power Point**, or **APP**, is a simple box made to tidy-up automation system cables backstage. Each **APP** is equipped with receptacles to connect power and data to a **Stagehand** automation controller. Installing a series of **APP**'s throughout a performance space drastically reduces the amount of cable used in each production. Load-in the machines and **Stagehand** controllers, then run short cables to the nearest **APP**. Enjoy cleaner, simpler, automation.

Applications

- Academic theatres
- Regional theatres
- Houses of worship
- Concert halls

Features

- Rugged NEMA-1 enclosure
- NEMA L15-30 power receptacle for Stagehand controllers
- XLR-5 Showstopper receptacle for emergency stop connection
- RJ45 receptacle for network connection
- Downward-facing receptacles keep cabling close to the wall
- Holes for 3/4" conduit connection (right, left, top)
- DIN-rail terminals for easy field installation
- Clearly marked receptacles on the outside
- Clearly marked terminals on the inside
- Optional customized marking for box numbering

Automation Power Point
\$850

Hardware Specifications

- 14-gauge steel construction
- Black powder coating
- White label marking
- Optional laser-etched serial numbering

Controller Compatibility

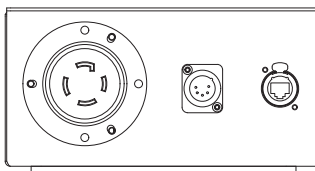

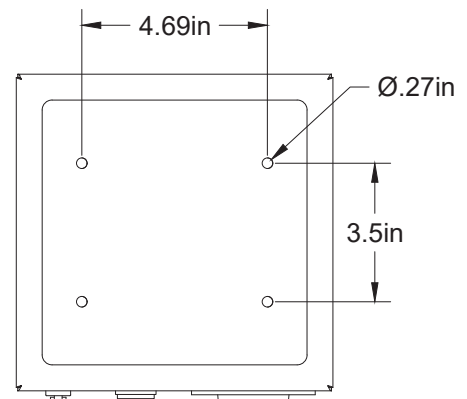

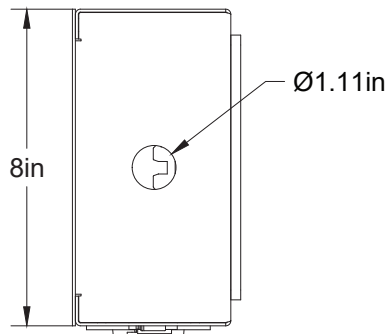

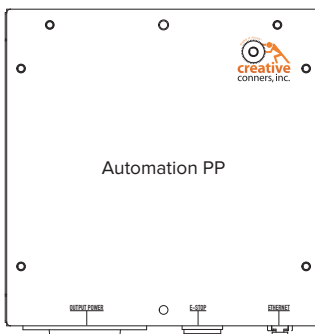

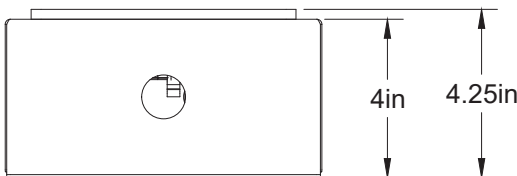

- Stagehand Pro™ 5HP
- Stagehand Apprentice™ 5HP
- Stagehand Classic™ 5HP

Technical Support

Creative Conners stands behind its products with insanely good technical support via phone, email, and through the web.

Dimensions

8"W x 8"H x 4.25"D

Electrical

- **Power output** 200-240VAC 50/60Hz 30A FLA 3PH (NEMA L15-30)
- **E-Stop output** 24VDC 5A (XLR 5-pin)
- **Ethernet** (RJ45)

Ordering Information

- APP-01

Warranty

Creative Conners products ship with 1-year warranty against defects in materials or workmanship. Repair service is available after warranty at reasonable rates.
